Core Examinations Event

FRED LONGWORTH HIGH SCHOOL

Timings:

- **Sessions 1 and 2** (**English** and **Maths**) will take place in this room until approx. 7pm.
- **Session 3** (**Science**) will take place in the main hall until approx. 7:30pm.

Aims of the evening:

- To provide you and your child with **specific** revision strategies for core subjects to be used in the upcoming mock examinations, and in the final approach to the GCSEs.
- To offer practical advice to parents for helping your child to complete effective revision.

Year 11 Examinations Night

FRED LONGWORTH HIGH SCHOOL

Maths Foundation Tier

Exam dates…

Paper 1 : Friday 14th May 2027

Paper 2 : Thursday 27th May 2027

Paper 3 : Monday 14th June 2027

Paper 1

Question	Topic	Max Score	Actual	%	MW clip
q1	Metric Conversions	1	1	100%	112
q2	Simplifying Algebraic Expressions	1	1	100%	A6
q3	Reflection with Diagrams	1	1	100%	G4a
q4	Place Value	1	0	0%	2

	Ratio, Fractions and Percentage				
q26a	Standard Form small	1	1	100%	83
q26b	Standard Form large	1	1	100%	83
q26c	Standard Form multiplication	2	0	0%	83
q27	Ratio combining	3	3	100%	200a
q28	Angles in parallel lines	4	2	50%	120
q29	Finding volume, then mass and density	3	0	0%	142b
q30	Estimate the mean	3	1	33%	130b

Year 11 Examinations Night

FRED LONGWORTH HIGH SCHOOL

Maths Foundation Mock Revision List

Paper 1: Wed 2nd Dec, 2026

Paper 2: Tues 8th Dec, 2026

Paper 1	Paper 2
2D shapes	Angles in polygons
Area of basic 2D shapes	Calculating with vectors
Basic equations of straight lines	Comparing fractions
Basic inverse proportion	Compound interest
Basic proportion (unitary method)	Continuing a sequence
Best buys	Cube numbers
BIDMAS	Enlargement
Calculating the mean	Error intervals
Conversions	Expanding double brackets
Co-ordinates	Frequency trees
Distance time graphs	Function machines
Drawing linear graphs	Generating numbers in a sequence
Estimation	HCF/LCM
Expanding and factorizing (single brackets)	Identifying angles
Expressing a decimal as a %	Median
Fractions of an amount	Money
Money problems	Ordering FDP
Multiplying decimals	Percentage of an amount
Negatives in real life	Percentages of an amount
Nth term	Pictograms
Percentages of an amount	Properties of 3D shapes
Probability	Proportion
Probability scale	Quadratic graphs
Recipes	Reflection
Scales	Rounding
Scatter graphs	Scales
Simplifying ratio	Sharing a ratio
Solving quadratic equations	Simplifying algebraic expressions
Substitution	Solving linear equations (2 unknowns)
Volume and surface area of cubes	Standard form
	Time
	Venn-diagrams

Year 11 Examinations Night

FRED LONGWORTH HIGH SCHOOL

Let's pick a topic: RATIO

But how do I revise ratio???

Year 11 Examinations Night

FRED LONGWORTH HIGH SCHOOL

What do you know already?

Paul and Sue completed a project together and are paid for it in the ratio 3 : 5.
Sue is paid £2400.
How much is Paul paid?

Paul and Sue completed a project together and are paid for it in the ratio 3 : 5.
Sue is paid £2400 more than Paul.
How much is Paul paid?

£2400 3 : 5

Paul and Sue completed a project together and are paid for it in the ratio 3 : 5.
In total, they are paid £2400.
How much is Paul paid?

Paul and Sue completed a project together and are paid for it in the ratio 3 : 5.
In total, they are paid £2400.
What fraction of the money is Paul paid?

Paul and Sue completed a project together and are paid for it in the ratio 3 : 5.
In total, they are paid £2400.
What fraction of the money is Paul paid?

What can you do to help?

- Remember there are so many maths resources already done and videos to watch. (We will go through)

- Encourage your child to use the topic list and focus on topics they find **DIFFICULT**.

- Use resources with answers so you can **check** together.

Ratio Revision…

Mathsgenie : Ratio search…

Generates 16 different questions, all GCSE style instantly.

All **answers** to the questions with working out to check!

Interactive questions to try

a) Write the ratio

24 : 18

in its simplest form.

b) 150 people attend a play.
45 of them are male.

Write the ratio male : female in its simplest form.

Revision guides and workbooks…

Revision Guide

Ratio 2

Ratio is used in lots of problem-solving questions. You need to be able to answer ratio questions like the ones on this page **without using a calculator**. Remember that you won't have one for Paper 1.

Golden rule

You can answer lots of ratio questions by working out what **one part** of the ratio represents.

Worked example

Target grade 3

Alexis, Nisha and Paul share a flat. One month their phone bill is £120.
They decide to split the bill in the ratio 3 : 5 : 2
How much does each person pay? **(3 marks)**

3 + 5 + 2 = 10
120 ÷ 10 = 12
3 × 12 = 36. Alexis pays £36.
5 × 12 = 60. Nisha pays £60.
2 × 12 = 24. Paul pays £24.

To divide a quantity in a given ratio:

1. Work out the total number of parts in the ratio.
2. Divide the quantity by this total.
3. Multiply your answer by each part of the ratio.

The order the people are written in is the same as the order of the numbers in the ratio. Alexis is first in the list, so 3 parts of the ratio represent the amount she pays.

Check it!
£36 + £60 + £24 = £120 ✓

Worked example

Target grade 4

Jamie and Chaaya took part in a sponsored swim to raise money for charity.
The ratio of Jamie's total to Chaaya's total is 5 : 7
Chaaya raised £12 more than Jamie.
How much money did they raise in total? **(3 marks)**

7 − 5 = 2
2 parts = £12 so 1 part = £6
Jamie = £30
Chaaya = £42
Total = £30 + £42 = £72

Problem solved! Start by working out what one part of the ratio represents.
Chaaya raised £12 more than Jamie so **two parts** of the ratio represent £12. Therefore, **one part** of the ratio represents £6.
So Jamie raised 5 × £6 = £30
Chaaya raised 7 × £6 = £42

Check it!

£42 − £30 = £12 ✓

Now try this

Target grade 4

1 Ruth, Sue and Tess share £400 between them.
Ruth receives £80 more than Sue.
The ratio of Ruth's share to Sue's share is 9 : 5
Work out how much Tess receives. **(3 marks)**

2 Terri mixed 300 g of rice with 240 g of fish.
She added some onion to the mixture.
The ratio of the weight of fish to the weight of onion was 3 : 2
Work out the ratio of the weight of rice to the weight of onion. **(3 marks)**

Worked solution video

Ratio 2

Target grade 3

Guided

6 Solder is made from lead and tin. The ratio of the mass of lead to the mass of tin is 2 : 3

(a) Kyle made 70 g of solder. Work out the mass of the lead used.

Total parts = ... + ... = ...

1 part = 70 ÷ ..... = ... g

2 parts = 2 × ..... = ... g **(2 marks)**

(b) He then uses 16 g of lead to make some more solder.
Work out the mass of solder he made.

..... g **(2 marks)**

Target grade 4

Guided

7 Gabby and Harry shared some money based on their ages. The ratio of Gabby's age to Harry's age is 3 : 8. Harry received £2000 more than Gabby.
How much money did they share?

Problem solved! Harry received £2000 more than Gabby and 8 − 3 = 5 so five parts of the ratio represent £2000.

8 − 3 = 5 parts

5 parts = £2000

1 part = £2000 ÷ 5 = ...

11 parts = 11 × ..... = ...

In total they shared £..... **(3 marks)**

Target grade 4

8 Asha uses an old recipe to make some cakes.
The ratio of the weights of flour, margarine and sugar needed for the recipe is 5 : 4 : 3
Asha has the following amounts of each ingredient.

1825 g of flour
700 g of margarine
250 g of sugar

Each cake needs 48 g of the combined ingredients. Show that the maximum number of cakes she can make is 20.

(3 marks)

Revision Workbook

Revision cards…

- Remember that **DOING** maths is better than **READING** maths.

- Encourage your child to actually sit and answer questions and **check** them.

- Make some **revision cards**, with a skill/formula on one side, and an example question on the other.

- Tick off once a skill is mastered and know what isn't yet fully understood!

Writing & simplifying ratio

- Always label which parts represent what. The order they are mentioned in the question is the order they are in.

eg1 Luke & Jordan share pizza in the ratio 2:3. What fraction did Jordan eat?

eg2 $\frac{5}{8}$ of children are girls. Write the ratio of boys to girls

- When simplifying check units are the same. Simplified ratios shouldn't have decimals in.

eg3 Simplify 40cm : 2m eg4 Simplify £1·40 : £3

- 1:n means make the first part 1, n:1 means make the second part 1.

eg5 Write 5:4 in a) 1:n form b) n:1 form

---

eg1 2 (L) : 3 (J)

$\frac{3}{5}$

eg2 Boys : Girls

$\frac{3}{8}$ $\frac{5}{8}$

so 3 : 5

eg3. 40cm : 2m

40 : 200

÷40 ↓

1 : 5

eg4. £1·40 : £3

140 : 300

÷10 ↓

14 : 30

÷2 ↓

7 : 15

eg5. a) 5 : 4

÷5 ↓

1 : 0·8 ÷5

b) 5 : 4

÷4 ↓

1·25 : 1 ÷4

Sharing in a ratio.

Think carefully about if you are sharing between all the parts, one section or a difference.

Boxes really help for this.

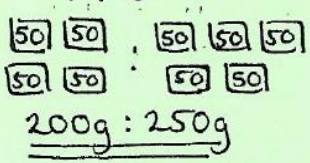

eg, Share 450g in the ratio 4:5

eg$_2$ Anne & Bill share money in the ratio 3:7. Bill gets £56, how much does Anne get?

eg$_3$. In an office the ratio of males to females is 2:13. If there are 33 more females, How many males are there?

---

eg$_1$. 4 : 5

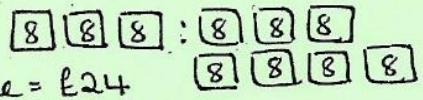

200g : 250g

450 ÷ 9 = 50

eg$_2$. A : B

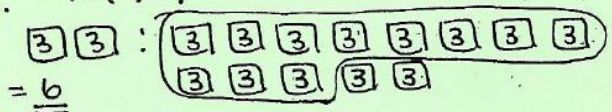

3 : 7

£56 ÷ 7 = £8

Anne = £24

eg$_3$. M : F

11 boxes extra

33 ÷ 11 = 3

males = 6

Combining ratios.

You can combine two ratios into one by finding a common multiple.

eg, In a house the ratio of dogs to fish is 1:10. The ratio of fish to cats is 6:1. What is the ratio of dogs to cats?

Map scales

Remember the map is the smaller part.
Work out the conversion rates like an exchange rate.

1km = 1000m
1m = 100cm
1cm = 10mm

eg2 A map has a scale of 1:50000. What is the map distance if two towns are 32km in real life?

---

eg1 D : F F : C

1 : 10 6 : 1

×3 ↘ ↙ ×5

D F C

3 : 30 : 5 → D:C 3:5

×50000

Map real life

eg2 1 : 50 000

÷50000

32km ×1000 → 32000m ×100 → 3200000 cm

3200000 ÷ 50000

= 64cm

Revision sessions…

Wednesday after school, 3:15pm.

Mrs Heywood – Gen 1
Miss Gallagher – M9
Mrs Poulton – M1
Mr McKeown – M3
Mr Dearnley – M5

Other things to note…

We have concerns regarding inappropriate use of AI for completing homework and revision tasks.

If your child misses a maths lesson, it is their responsibility to catch up on missed work, as we don't have time to reteach content.

Revision guides and workbooks are available to order from school for £6 (total). You can send the cash in or pay on wisepay.

To summarise…

- **Mathswatch** – the videos are great for learning the skills and the interactive questions provide you with instant feedback.
- **Corbett Maths** – another way to watch videos and practice what you have learnt. All questions have answers attached.
- **Mathsgenie** – great for exam style questions. All exam questions have worked solutions.
- **Self Directed Study Hub** – on the school website. Past papers available, revision list.
