

Fred Longworth High School Construction Site Newsletter

No 1 – June 2022

Welcome to our newsletter, which aims to keep you up to date with what is happening on our site.

Introduction

Hello and welcome to our first Newsletter. BAM Construction have commenced works to construct the new school at Fred Longworth High School. We are currently progressing a combined sewer diversion on behalf of United Utilities, once complete we will then be able to progress with the full site strip and preparations for the piling and foundation works.

New High School coming Sept 2023.....

Below is an image of the proposed new school, this is being constructed on the existing grass pitch north of the current school buildings. Once the new school is completed and handed over BAM will then progress the strip out and demolition of the existing school building and complete the scheme with the provision of a new grass pitch and hard court pitches to the south of the campus.

Further Information

For more information about the new scheme please check out the school website below.

What to expect.....

With all major construction works disruption can have a negative effect on the local community and this is something we actively try to minimise wherever possible. An increase in heavy good vehicles will occur during construction and BAM have put in place fencing down Printshop Lane to separate the public from our entrance gate to the site.

BAM also have various responsibilities under planning to ensure we work in a considerate manner to respect the local neighbours whilst we complete the new school, more information can be found on the Wigan Council Planning Portal.

Noise, dust and traffic are often the biggest disturbances to the local community and we will be putting measures in place to minimise our impact. BAM are also members of the Considerate Constructors Scheme which will be advertised on our hoarding, the scheme also provides opportunity for the public to provide their comments or opinions on the scheme.

For your opportunity to leave comments about the construction works see below QR Code, when scanned on you own device will give you an opportunity to leave us feedback.
